LOVE YOURSELF IN GANGNAM

Gangnam is the hub of culture and tourism, welcoming six million tourists from all over the world every year. It is the center of Korean culture, art, IT, education, and finance, and it is known as the “Beauty Belt,” leading the fashion and beauty industries in Korea. Above all, Gangnam is at the heart of medical tourism because it is home to a number of clinics and hospitals that offer world-class medical services of various specialties, from plastic surgery and dermatology to a general hospital. That is why Gangnam has been the top destination of medical tourism, hosting international patients seeking the best quality medical services. Also, ACP Medianje Medical Tourism provides quality non-medical services only found in Gangnam, such as concierge service assisting international patients from clinic visits and treatments to sightseeing, and interpreting services in various languages. ACP Medianje Medical Tourism will be the best gift for a new life you dream of

Gangnam Medical Tour Center

2022 New Cooperative Organizations

Doctor Interviews

Gangnam-gu Medical Tourism Cooperative Organizations

Gangnam has so much to offer: from high-quality medical services to attractive tourism attractions. As people resume traveling in a post-pandemic world, more people are coming to Gangnam, once again raising its reputation as the top medical tourism destination.

131,808

(AS OF 2019)

There were 131,808 foreign medical tourists that visited Gangnam in 2019. It accounted for 26.4% in Korea. Many medical tourists in Seoul have been highly satisfied with their treatments at excellent medical institutions of various specialities in Gangnam, including plastic surgery, dermatology, ophthalmology, Korean medicine, and medical check-ups.

45

ACP Medianje Tour Korea has 45 professional coordinators that provide interpreting services in eight languages (English, Chinese, Russian, Japanese, Thai, Mongolian, Spanish, and Vietnamese) for clinic visits or sightseeing.

2,812

As the medical hub with 2,812 medical institutions closely located to one another, Gangnam Medical Tour Center is the first local government in Korea that runs a medical tourism platform, on which medical institutions and international patients can communicate directly. The platform offers a variety of benefits for medical tourists, including discount coupon, self-diagnosis tool, and free consultation service, which compares the detailed information from multiple medical institutions, such as costs, required time, and procedures.

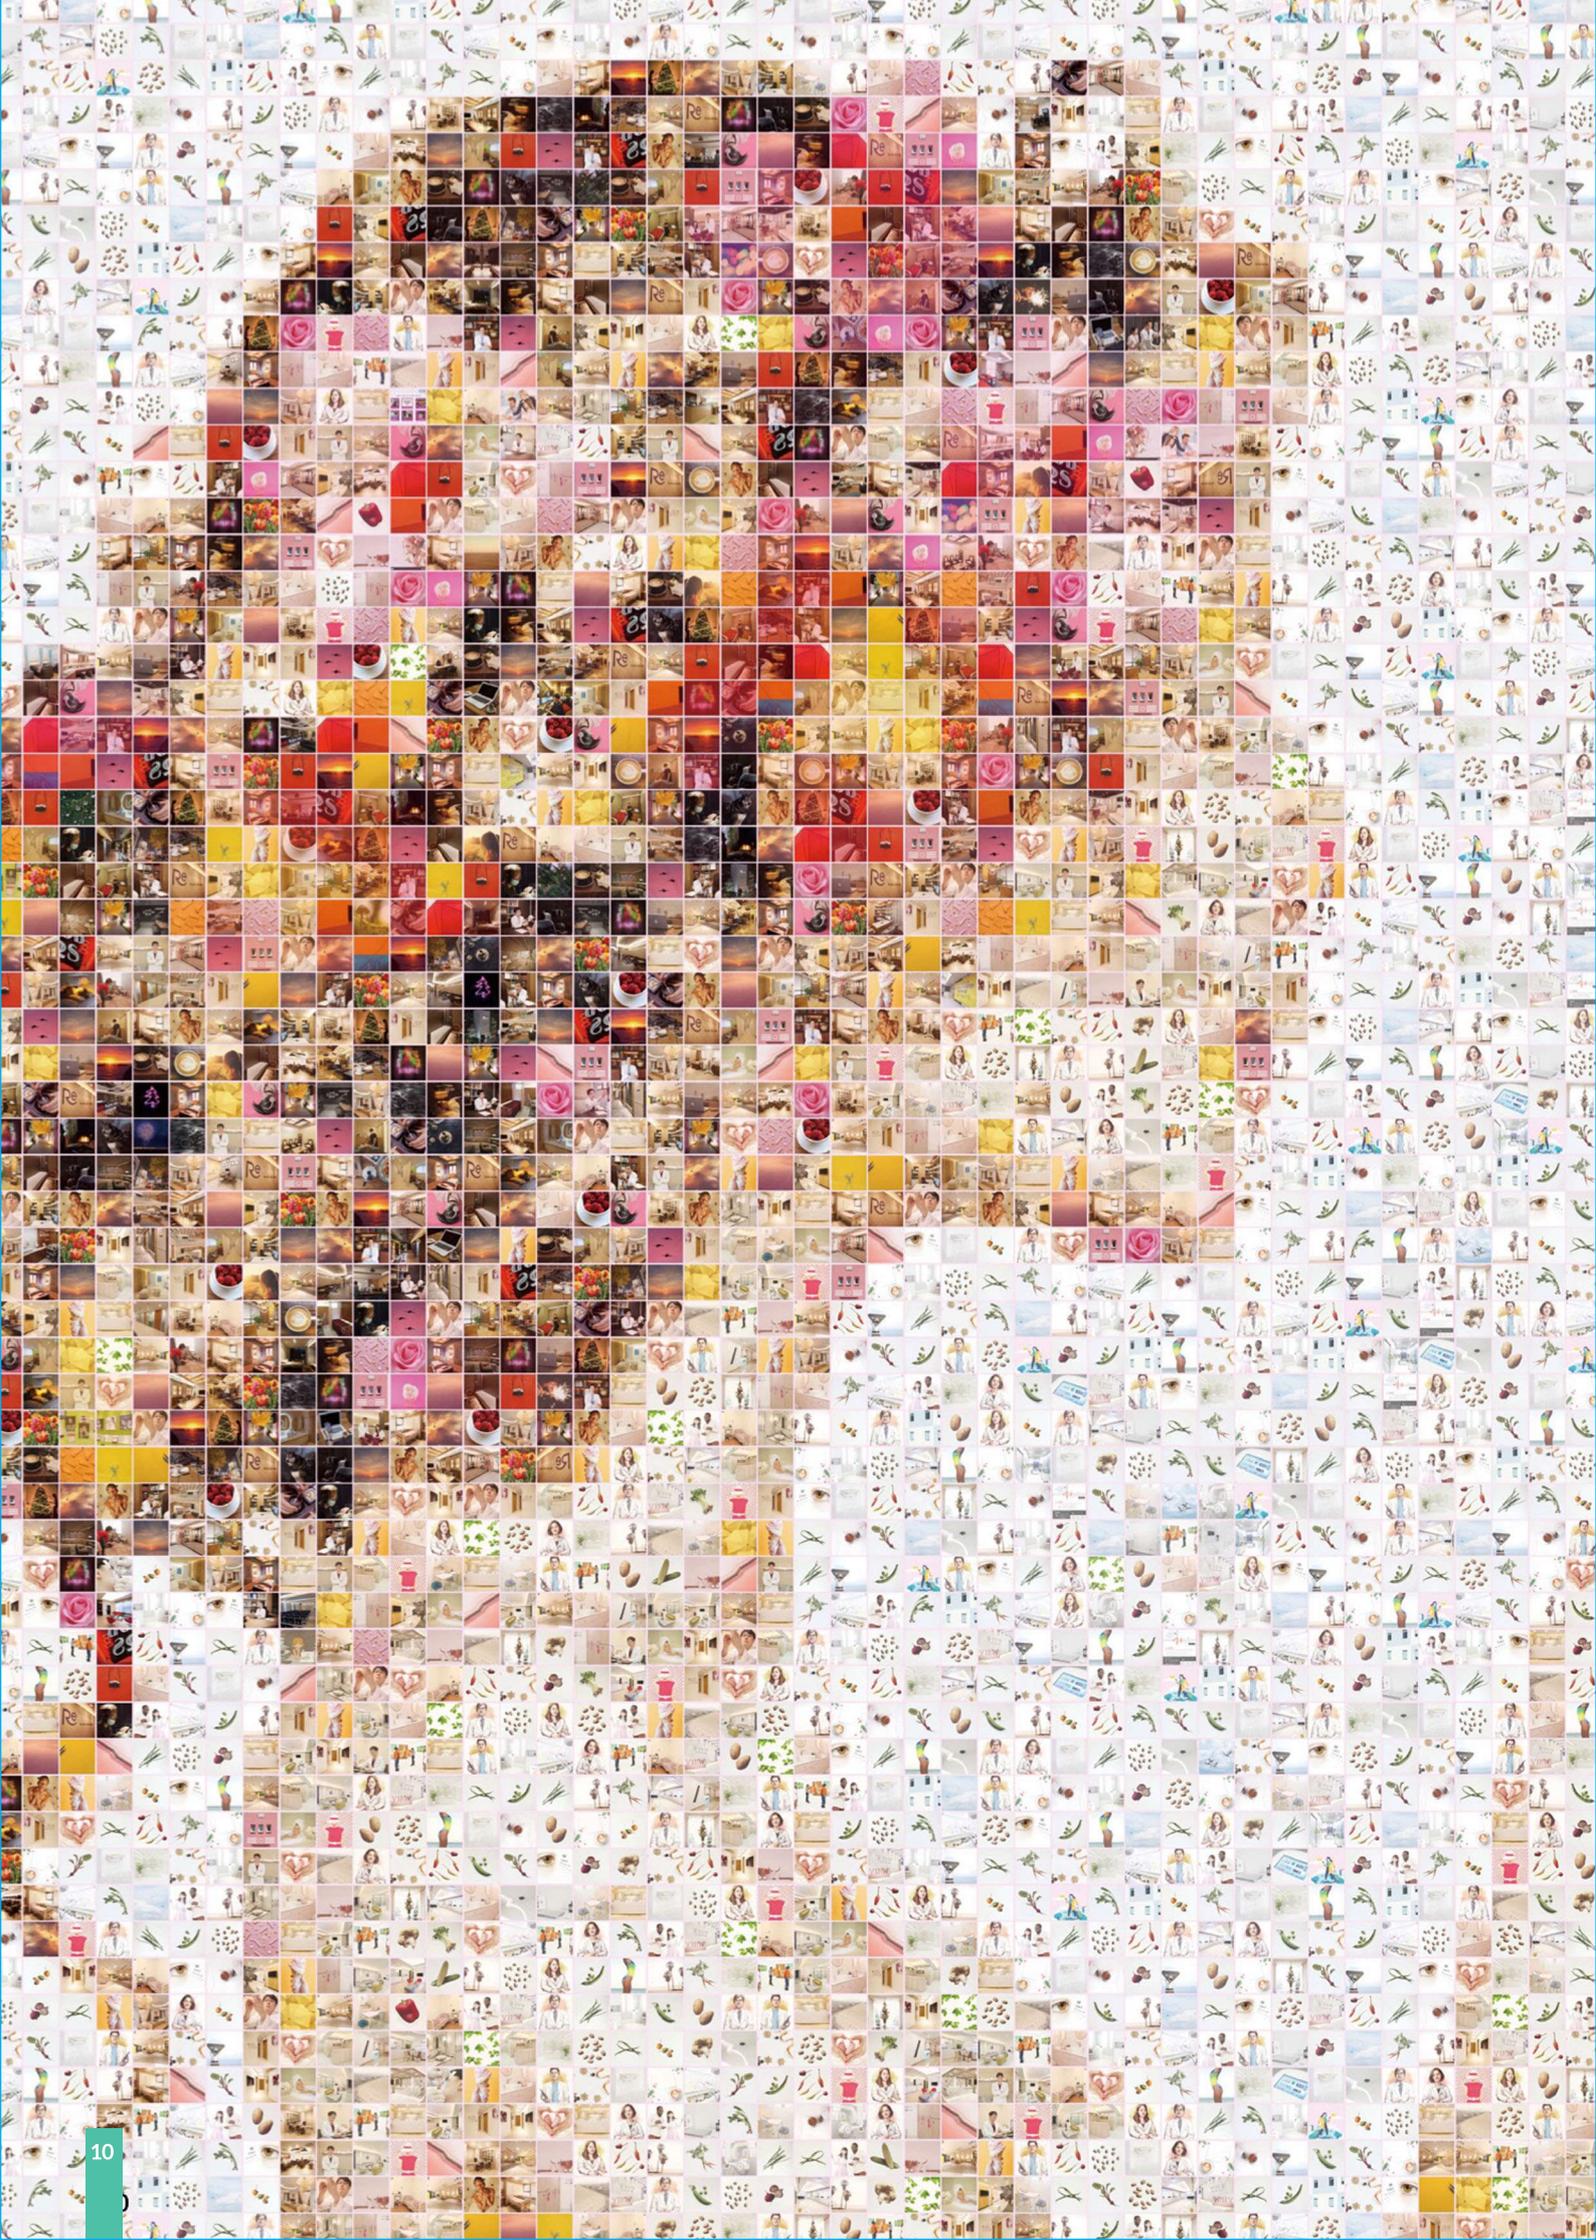

70.7%

Thanks to its advanced medical technology and techniques, the 5-year relative survival rates (RSRs) for major cancers in Korea is 70.7%: thyroid cancer (100%), breast cancer (93.6%), and prostate cancer (94.4%). These are reported to be higher than those of medically advanced countries, such as the United States and the United Kingdom. The 5-year RSR for gastric cancer is a good example, Korea being 68.9% and the U.S. 33.1%.

1/10

Korea has the lowest healthcare costs in the OECD countries. You can enjoy high-quality medical treatments and services at a low cost - about 1/10 of the costs in the U.S.

LOVE YOURSELF IN GANGNAM

Gangnam has specialized services ready for you to promote your **health and** beauty. The best **medical professionals** in each specialty and attentive coordinators work together to provide the **best medical services.** Let's **go on a special journey** to find a new beauty and a healthier life. **Gangnam** will be the most special **choice for yourself.**
